OMAR AYMAN ALMARAKBY

ELECTRICAL & CONTROL ENGINEER

📍 Birket El Sab, Monufia, Egypt
📞 +20 1090585322 | ✉️ omarmarakby050@gmail.com

PROFESSIONAL SUMMARY

Detail-oriented **Electrical & Control Engineering** graduate from the Arab Academy for Science, Technology and Maritime Transport (AASTMT). Experienced in classic control systems, IoT-based monitoring, EV conversion systems, railway signaling networks, MV cable accessories, and power distribution. Proficient in ETAP, MATLAB, Simulink, and relay logic with solid hands-on industrial training.

EDUCATION

Bachelor of Science in Electrical & Control Engineering — **Graduation: June 2026**

Arab Academy for Science, Technology and Maritime Transport (AASTMT)

- **Key Focus Areas:** Control Systems Engineering, Power Systems Analysis, Electrical Machines, Switchgear & Protection, Relay Logic, and Automation Systems.

TECHNICAL SKILLS

Control & Automation:	Classic Control Systems, Relay Logic, Contactor Circuits, Industrial Control Panel Design
Software & Simulation:	ETAP, MATLAB, Simulink, Microsoft Office Suite (Excel, Word, PowerPoint)
Power & Distribution:	Medium Voltage Cables & Accessories (up to 36 kV), Grid Distribution, Railway Signaling Systems, Transformer Operations
Emerging Technologies:	IoT-Based Monitoring & Data Acquisition, Smart EV Conversion Systems

ENGINEERING INTERNSHIPS & FIELD TRAINING

Elsewedy Electric PSP — **Sep 2025 – Oct 2025**

- Completed specialized training in automated control systems, railway power distribution, and signaling networks.

Elsewedy Electric Cable Accessories — **Apr 2026**

- Received practical training on Medium Voltage (MV) cables and accessories operating up to 36 kV.

Alexandria Electricity Distribution Company (AEDC) — **Aug 2023 – Sep 2023**

- Participated in hands-on field training in grid infrastructure, transformer operations, and power distribution management.

ACADEMIC & PRACTICAL PROJECTS

Graduation Project: Retrofitting Internal Combustion Vehicles into Smart EVs Using IoT — **2025 – 2026**

- Designed and built a low-cost EV conversion prototype and testing setup.
- Integrated IoT-based telemetry and data acquisition to monitor real-time battery parameters and system performance.
- Conducted comprehensive system testing, validation, and calibration for electric motors, battery packs, and electronic speed controllers.

Power System & Industrial Control Project — **Academic Project**

- Designed and built hardwired classic control panels for key industrial automation applications.
- Modeled electrical networks using ETAP for precise load flow and short-circuit fault analysis.

LANGUAGES

- **Arabic:** Native Speaker | **English:** Professional Working Proficiency
